2	References.....	10

Status	IN PROGRESS
Outcome	To be reviewed and inform Accenture's build of the EPC - Jan-Apr 2026
Owner	Carl De'ath Richard Ward

1 Introduction

1.1 Master Sheet Data Points

The follow data points are extracted from the DUEC Master Log and added to a CSV file.

Column	Title	Example	Notes
B	ODS Code	FJ506	This is the pharmacy ODS Code
I	Pharm+ DoS Service ID DoS Team Use Only	2000024349	
E	Existing Supplier	Sonar	
Q	New Supplier	Pinnacle	

1.2 Pre Processing

Using the values above lookup the product id for the existing and new suppliers (this is a local lookup not a feature of the Endpoint Catalogue) and populate a csv file which then be pushed to a S3 bucket for processing, note that the CSV can contain multiple lines.

CSV Structure

Item	Example	Source
Organisation Code	FJ506	
Service Id	1000099999	
Existing Product Id	PinnaclePharmOutcomes-v2024.12.12	
New Product Id	SonarSupperSoftware-v2025.1.8	

1.3.1.2 Example Response

```
{
  "resourceType": "Bundle",
  "type": "searchset",
  "total": 1,
  "meta": {
    "profile": [
      "https://simplifier.net/guide/NHSBookingandReferrals/UKCore-Bundle"
    ],
    "entry": [
      {
        "resource": {
          "resourceType": "HealthcareService",
          "id": "d1490928-8773-455b-99f5-197476e3305a",
          "meta": {
            "lastUpdated": "2021-11-26T15:00:00.8185338+00:00",
            "profile": [
              "https://fhir.hl7.org.uk/StructureDefinition/UKCore-HealthcareService"
            ]
          },
          "identifier": [
            {
              "system": "http://fhir.nhs.uk/Id/dos-service-id",
              "value": "10000999999"
            },
            {
              "system": "http://fhir.nhs.uk/Id/product-id",
              "value": "AAA000"
            }
          ],
          "active": true,
          "providedBy": {
            "reference": "Organization/d5ffd0cd-ec7e-48a1-84f1-91f4c0eb8fc5",
            "display": "Parent Trust Organization"
          },
          "name": "Emergency Department A",
          "endpoint": [
            {
              "reference": "Endpoint/4e958d43-ad80-40c9-85ff-2be003d1ea86"
            }
          ]
        },
        "search": {
          "mode": "match"
        }
      }
    ]
  }
}
```

If no HealthcareService is located then it needs to be created before this change can be processed.

1.3.2 Get Existing Endpoint

Using the the following parameters invoke GET /Endpoint to retrieve the existing Endpoint

Parameter	Type	Example Value	Notes
Organisation	Header	<pre>{ "resourceType": "Organization", "identifier": [{ "value": "FJ506", "system": "https://fhir.nhs.uk/Id/ods-organization-code" }] }</pre>	Note - This is example is pre-encoding
X-Request-Id	Header	c1ab3fba-6bae-4ba4-b257-5a87c44d4a91	
X-Correlation-Id	Header	9562466f-c982-4bd5-bb0e-255e9f5e6689	
productId	Query	"PinnaclePharmOutcomes-v2024.12.12"	
HealthcareService.Identifier	Query/_has	_has:HealthcareService:endpoint:identifier=http://fhir.nhs.uk/Id/dos-service-id 10000999999	This is required to ensure the Endpoint has a relationship to the HealthcareService

Parameter	Type	Example Value	Notes
payloadType	Query	payloadType=http://terminology.hl7.org/CodeSystem/endpoint-payload-type-epc bars	We only want a BaRS Endpoint, the HealthcareService could have other types of Endpoint from the same supplier, ITK for example.

1.3.3 Template Check

Get the Template for the new supplier using GET /Endpoint/\$template using the parameters below

Parameters required on the call are as follows:

Parameter	Type	Example Value	Notes
Organization	Header	<pre>{ "resourceType": "Organization", "identifier": [{ "value": "FJ506", "system": "https://fhir.nhs.uk/Id/ods-organization-code" }] }</pre>	Note - This is example is pre-encoding
X-Request-Id	Header	c1ab3fba-6bae-4ba4-b257-5a87c44d4a91	
X-Correlation-Id	Header	9562466f-c982-4bd5-bb0e-255e9f5e6689	
productId	Query	SonarSupperSoftware-v2025.1.8	

Parameter	Type	Example Value	Notes
payloadType	Query	payloadType=http://terminology.hl7.org/CodeSystem/endpoint-payload-type-epc bars	

1.3.4 Create the new Endpoint

Using the values returned create a new Endpoint based on this template, see [INV0032d - Create Endpoint Based on a Template \(Multi-tenanted Supplier\)](#)¹ for more information

1.3.5 Update the HealthcareService

On the Healthcare service there are two updates that are required

1. Add the new Endpoint as a reference
2. Remove the existing Endpoint reference

Once complete use PUT /HealthcareService to persist the change
